Another fun puzzle game from the creator of HexCells.. This game becomes frustrating and tedious. Places to save are in such horrible places, if you die you are in a perpetual loop of dying. The controls are awkward, probably the worse game i've played in awhile. And, I wanted to like it, it draws you back just to see what happens next. But, only after you've left it and thrown your temper tantrums several times.. Obviously a bit of an "extended" demo of the original game.

Although this is a 3D platformer it's not very "fun" to play. Aside from the robot only having a double jump and grabbing/throwing items, you *have* to explore and finding enough bolts/gears/whatevers to proceed within a level. Not different worlds, but to open a door in the same "level" so to speak. It also doesn't help that the "exploring" is incredibly boring - it's as if I'm jumping around a stock city.

Also, the camera is fixed. A lot. This made it annoying to do some platforming on small platforms because the camera is so far away from the robot (especially near the last area where I have to collect 150 of the things, which you lose all of them on death btw).

I really wish they gave the robot some form of attacking rather than having to time my jumps on small, fast-moving enemies or resorting to a fixed throw of an object.

This game (both the demo and this one) just gives me the impression that the game is just going to be bland, including the story (which is narrated, so I'm sure the story is supposed to be some major part of the game).. The game is a fun way to freak out VR newbies. I'd like to see new and crazier heights, like from outer space. It'd be cool to pass through clouds and see the earth's terrain approaching at terminal velocity.. update on the Vegas Pro 15 review.

The patches released have actually resolved the issues I had.

The software works really solid now and i can recommend it fully.

5/5

Old review:

I have been using the vegas products for a long time and its both love and hate.

1. functionality is great, when you set it up
2. easy to use
3. crashes a lot when you render
4. workaround is to restart with new settings from scratch

Annoying yes, but every other time it works great.

i have win 10 (1803), 32 gig ram, hepta core. 1080 gtx etc.

Patch and fix functionality and it would be the best video software but crashes with no info is annoying.

codec are also not always supported....

Clunky controls.. One of the better Zombie themed board games. Don't got any friends in real life? don't worry you can find some online and play with them! If you want to play a coop board game with zombies and where everyone has his own survivor, then this game is the one to try! Find weapons, kill zombies. The more zombies you kill, the more skilled you get; the more skilled you get, the more zombies appear. Best of all when you're done with the missions that comes with the game you can go to their website and download over 30+ missions! Everything from 2 players to 6 player! Just remember don't let the zombies eat your brains!. Pros:

Tanks are fun to use, sometimes

Cons:

SUPER repetitive

Guns are WILDLY inaccurate. Many years ago I got this game in some kind of bundle. The game looks weird which isn't a bad thing but I didn't know what to do. Now after all those years I wanted to try this game one more time to see if this was really that weird. Sadly, the game is no longer playable. When trying to open the game, you will get redirected to another Meridian4 (dev) game called "R.I.P.". Besides I'm pretty sure the game is not even being sold on Steam anymore, but that's no real loss.

P.S. I did not spend this many hours into this game, the game got stuck in the background.. I hate math.

gameplay : 7/10

graphic : 7/10. Really really really really really really really really really really hard.

. Sucks!

I played this game for 7 minutes. I tried being the bugs, I tried being the humans.

That was as much gameplay as I can see myself getting out of this game. 5 bucks on sale for 7 minutes?

Not worth it if you ask me.

You play as a human or a bug/spider/rodent and they just run around and try to smack you 3 times and you try to run away or vise versa. It isn't all that entertaining. It plays out like a really bad version of that Counter Strike Hide n Seek mod that lets you disguise yourself as any item in the map. It feel like that but way worse and in cramped quarters. you are in this really small house with nowhere to hide basically so the humans are at a pretty big advantage over you. It's just not that great. It's bland and lacking. For 5 bucks buy payday 2 instead.

Rating: 2/10

It's bug free aside from the insects that you play as. I didn't find it fun. There is nothing to it really.. If you're interested in this game at all, I would 100% say you should buy it. It's quirky, funny, and also just the right amount of heartbreaking for it to feel real and meaningful. The art style is unique, cute, and pleasing to the eye, and the writing is very well done as well. I got so attached to these characters while playing that I found myself tearing up when they were sad or squealing when they were happy (or when a certain someone told me he loved me...)

I'm not sure what else to say except buy this wonderful game <3
